## Why participate in Rapid China Entry Program?

Since 2003, we have accumulated a wealth of experience while helping to generate tens of millions of dollars in export sales to China for western clients through our China Sales Incubator program. Now by leveraging that experience, we can quickly size-up any product for fit in the Chinese market, identify the best opportunities, and develop a pragmatic and cost-effective sales plan. We provide everything you will need to initiate a rapid China market entry. We are confident that our Rapid China Entry Program will put your business on the fast-track into China.

Chris Wingo, Managing Director, China Sage Consultants

## What is included in the Rapid China Entry Program?

**Short Answer:** You get everything needed for a fast and effective start in China. **Long Answer:** We educate you about selling and business in China through a personalized China seminar delivered at your place of business. We'll engage your team in a comprehensive discussion about your company, product, and objectives for China. We then gather information in China relevant to your business through our various channels, including potential customers. Finally, we analyze the market situation then formulate a pragmatic and actionable China entry and startup sales plan, which we will review with you. You will end up spending less time and money for a better result than you are likely to achieve through other options.
